Projects

MERN Stack E-Commerce Platform | *MongoDB, Express.js, React.js, Node.js*

- Developed a full-stack e-commerce web application featuring secure user authentication via JSON Web Tokens (JWT) and dynamic product cataloging.
- Integrated a functional shopping cart system with responsive UI elements built in React and state management handled via React Context API, backed by a scalable MongoDB database.

Collaborative Task Management Tool | *React.js, Node.js, Express.js, MongoDB*

- Built a real-time project dashboard allowing multiple users to create, assign, update, and delete workflow tasks in an interactive Kanban layout.
- Implemented robust backend REST APIs to handle CRUD operations safely while organizing database structures with Mongoose schemas for optimal query performance.

Real-Time Blogging Application | *MongoDB, Express.js, React.js, Node.js, Tailwind CSS*

- Designed and engineered a multi-user blogging space where individuals can write, edit, view, and interact with written articles using rich text data fields.
- Optimized frontend rendering with tailored Tailwind CSS UI/UX components and deployed a resilient Node/Express backend configuration for quick content delivery.
